

Satellite radio (XM and Sirrius) provide a valuable service to the community. The programming on satellite radio is not a duplicate of the programming found on FM or AM radio. by allowing consumers access to a variety of programming, you are ensuring freedom of expression across the country. The National Association of Broadcasters should not be allowed to dictate what I am allowed to hear, especially when satellite radio is a service I subscribe to. I respectfully urge the FCC to reject the NAB's petition 04-160 and to support satellite radio's ability to provide the kind of programming that I demand and deserve. Thank you for your consideration.
